What's new in Black Maou Amp; Rainbow Kingdom:

EDIT I just made a small mod of my own which makes it possible for you to quickly type in a Maou's name to make it automatically change, so we (me, Nia, and Armor) can just change Maou's name from Maou and her NPC name from Moou. The program does not work in the alpha version, so if it does work, it will be (I won't even be surprised if) disabled in the beta. ::TL;DR:: Click the image to download Here you go, try it!: Again: Click the image to download Here you go, try it!: nia-maou.zip Again: Click the image to download Here you go, try it!: Again: Click the image to download Here you go, try it!:Ethernet Payload Label (EL): Packet Priority Payloads are transmitted asynchronously by the sender Ethernet device or by a Fast Ethernet device based on a lower priority value of 0-7. The link-layer service of the packet service class has a priority value of 7. A transmit service class mapping can be defined in the device that is responsible for transmit functions for the Ethernet protocols or media access control (MAC) addresses that belong to the different packet priority classes in the same way as described in Section 4.2.5, below. Priority is a feature of the endpoint. Higher priority values indicate higher importance. Quality of service feature (such as IEEE 802.1p) can be integrated with IEEE 802.1TS. 4.2.6 : Aggregation Aggregating frames in an Ethernet interface of a CPU, CT, or MC is configurable. CPU: In standard case the four ports of the CPU will be aggregated when multipliers or special MAC features are not used (CPUFEEDBACK feature bit in the MAC). Multiple frames can be sent on a single physical link equipped with aggregator function (Figure 8). Figure 8. Aggregating frames in Ethernet interface of a CPU. For TSO or GSO, if the CPUFEEDBACK feature bit is set, there is no difference between using aggregators or not and after TSO or
