Field of the Invention This invention relates to apparatus for changing the relative weight of a motorcycle. 2. Description of the Prior Art The present invention relates to apparatus for changing the relative weight of a motorcycle, particularly a motorcycle on which one or more passengers can be carried. Lightweight motorcycles have gained popularity as a means of transportation in recent years and a variety of lightweight vehicles have been developed. The weight of a motorcycle can be reduced by decreasing the weight of its wheels and frame. However, when a motorcycle is reduced in weight by such means, the balance of the motorcycle tends to be adversely affected. In order to eliminate or reduce the adverse effects of this type of change in balance, an opening has been provided at the rear portion of the frame
