"HyperMotion Technology is the most advanced football video game technology to date," said Steven Rabelli, Senior Director of Design at EA Canada. "Players will be able to feel more responsive on the pitch and experience the most immersive football gaming experience yet." Winger/Central Midfielder Starts the match with 4/4 (100%) of his abilities. Moves intelligently and efficiently through the first 12 yards of the pitch. Puts defenders on his heels with clever movement. Can shoot an accurate left or right footed shot with pace. Has good footwork as a dribbler and can change direction off the ball with good technical skills and balance. Takes the ball from defenders and dribbles away from markers. Keeps cool under pressure and can defend accurately against stronger, more technical centre backs. Has good heading ability. Keeps the defenders at bay with good strength and great first touch. Possesses excellent passing ability. To the most dangerous areas of the field and can pick out teammates with his long range passing. Can dribble and keep possession well and hold up play with a high level of technical ability. Cuts off the ball quickly. Can beat defenders with his dribbling skills and offers a unique pace to make players shy away. Drops deep and receives the ball in good positions. Makes good use of the space created by attacking his full backs. Conclusion De Bruyne is a creative, intelligent and technically gifted player. He may not be the most physically strong player, but he can be effective at all stages of the game. With his precocious talent and high-end technical ability, he will be a real asset to any of the top teams. Verdict: I rated De Bruyne as the best player in the league after a week playing on FIFA Ultimate Team. He made the 1,000 XP milestone and pushed many of my teams to the top of the league with his performances. I really like his stats this year, especially his passing where he completed more passes from the midfield than anyone else in the league. On FIFA Ultimate Team, he is currently the most attractive player on the market. His attacking stats are good and he offers a lot of creation but his defensive stats aren't great. Nonetheless, he has lots of potential and would be a good fit for any of the top teams. Yaya Toure is a smooth and dynamic player. He is a

What's new in Fifa 22:

- Use the new **Pass Control** function to intercept your opponents passes and increase your on-ball control over the ball. This is especially useful in dribbling and ball possession.
- **AI:** the new, more complex AI algorithm creates more intelligent and rewarding decisions for both forwards and defences. Players now make more challenging evasive moves to spot you. The AI will increasingly take up advanced positions during a game, starting from the throw-in line, and if close to goal will move towards the ball.
- **Linemen:** this year, we're introducing positional defending into the game. Guards will react to certain types of passes and not just tackle the closest player within their position.
- **New Techniques:** come up with a free-kick bomb from the touchline, master the drills to spread the ball around and score with a first-time finish, or catch your opponent cold with an in-swinging corner.
- **Multiple New Players:** we've added over 100 new players to improve roster depth, while the transfer system has also been overhauled to make the entire management process more flexible. Enhance your team with the new outfield bench, adding both young and experienced players to your squad.
- **Universal Transfer System:** you now have the flexibility to customize the development of your players and change the order of your preferred development plays. You also have the power to automate your transfer strategy and accelerate the process.
- **Intelligent Matchday Tactics System:** opponent analyses make all the difference in the outcome of any match and this year, your AI manager can make use of weather, fatigue levels and changes in the team. In addition to this, have the battle ready with the new Targeting system. You can pick out a specific player and prepare a strategy to contain him by setting the positioning of your players or defenders. Keep them pinned and track him down.

FIFA is the leading brand in the Sports genre, as shown by more F1 titles sold than any other sports brand. The Official Game of the FIFA World Cup™ since the tournament's inception and the Official Video Game of UEFA Euro 2016, FIFA is the dominant brand in Electronic Sports. Players around the globe watch the biggest football competitions, including the FIFA World Cup™ and the UEFA Euro, with FIFA video games. The Official Game of the FIFA World Cup™ A history of success The evolution of football has seen it go from a simple game of passing and dribbling to a game of 10-man tactics, while the ability to host the world's largest sporting event has seen it evolve from a simple board game to an elegant and immersive venue that attracts millions of people to venues around the globe. Bundles: e.Sports Edition + FIFA Ultimate Team + FIFA Football 21 Master Edition + FIFA Ultimate Team Icon Pack Default: e.Sports Edition + FIFA Ultimate Team + FIFA Football 21 Master Edition e.Sports Edition: The e.Sports Edition adds the following features to the base FIFA experience. Approach Mode: It's your shot that matters, and the game lets you decide how you're going to get it. You can go through opponents or over them with powerful shots, or you can trick opponents out of position and lock them down. It's up to you. AI Reflex: The new, improved Reflex system means that the smarter your game, the better your reactions will be. Every decision you make in the game will have a knock-on effect, so it's your job to make sure that your playmaking teammates can exploit the right opening. Controlled Rush: The Controlled Rush system provides a measure of control over the flow of the game. Instead of players having to do simple things such as dribbling and shooting, they can tap the direction they want to go, and the game will react, knowing that you have control and only you will be there to make the play. Console Centre: The new console centre allows you to take your FIFA experience on the go, letting you play your game on the sofa or on the move. Competitions: Premier League The 2018/19 season continues on your console, with all new gameplay changes and official licences for the Premier League - the league of English football. Global
