field of artificial intelligence is overhyped and prolific, the most innovative AI companies often avoid the spotlight. Here are three of the most promising companies to watch. By Nick Newman It's Thursday evening. You are well into a productive work session, and the silence is interrupted by a loud clang. You whip around to see a robot set down a metal ladder next to your desk. "What the heck!" you exclaim, wondering how you got roped into working with robots. "I thought we were building a coffee maker," you joke. But no, it's an actual robot assistant, which is standing at your desk and handing you a smartphone. This is the most interesting part of the conversation. At this point, you're not worried about the robot or even what it's accomplishing. While it may seem odd to admit, you prefer the robot to humans for this simple reason: It doesn't have to try as hard. You could say, "Just give me the directions, I'll follow them," or "No problem, I know I'm going to be gone for a few hours

---

this afternoon,” but a robot can’t feign ignorance.

in my version, each line begins with an item in the wordbank, including one contribution available online ( overner ), and i have selected the rest from the hundreds more recordings that are accessible in the librarys london and boston spa reading rooms via the sound and moving image catalogue. why not register as a british library reader and plan a visit feel free to include a similar combination of archived and/or online parts of the collection the roku channel is your home for free, live, and premium entertainment. watch blockbuster movies, popular tv shows, 150+ live channels, kids entertainment, and award-winning roku originalsall totally free. plus, you can add over 50 premium subscriptions from showtime to bet+. the bottom line for me is this: if you cant effectively communicate that the online experience of your dvd is at least as good as what you can get at the

---

store, then you have a problem. and this is why we see so many people now happily paying online to watch movies. i cannot tell you how many times i have heard people complaining about the availability of a particular release. for example, from 2001 to 2005, we had no chance of seeing the new harry potter movie. not in the theater anyway. we waited until the movie came to dvd and then we watched it online. lets give you an example. if we buy a movie from the itunes store, we pay \$9.99. if we buy a movie from netflix, we pay \$7. if we buy a movie from redbox, we pay \$3. if we rent it from redbox, it costs \$1. if we buy it from blockbuster, it costs \$1.50. 5ec8ef588b
