Download

first, you must install the google toolkit for windows. you can do this in several ways: download the latest installer . if you're using windows vista or windows server 2008, see the getting started page . if you're using your development machine and wish to install a version that you'll automatically use during your build, create a

gutools folder in the c:\dev\suitebuilder directory and run the setup.bat script in it. this script will put everything in that dir into the correct location. this program is free software; you can redistribute it and/or modify it under the terms of the gnu general public license as published by the free software foundation; either version 2 of the license, or (at your option) any later version.

this program is distributed
