2. Conflict Detect Storm II PC Games Hello guys, I want to thank you for all the good work and the effort you put in making this mod! So, to download the mod I had to change one line in the ini file. One more thing, when you're going to download the mod, it should be Conflict Detect Storm II v1.Q. PHP: Remove last digit from a number and make it an integer I am looking for a way to remove the last digit from a number and turn it into an integer. For example, 1234 would become 123. To clarify, I'm looking to solve this problem for a web app I am working on, but I think the answer will be the same for normal scripts. Does anyone know if there is a built-in PHP function to do this? A: You could use rtrim() to remove the final digit, then use intval() to turn it into an integer. \$int = intval(trim(\$String, '.')); A: There is no built-in function for this. You would need to write a bit of code: \$num = 12345; \$num = substr(\$num, 0, 1); \$int = intval(\$num); The substr() method will trim the last character off a string. The intval() method will convert the result to an integer. For what it's worth, I don't think there's a better way, is the second time in two years, when the Pakistan foreign office has issued a travel advisory to Pakistani citizens to avoid travelling to India. The advisory says that the security risks posed by the Indian forces, "Travel to India is strongly discouraged because the government of India has issued a travel advisory to its citizens issued by the Indian security forces, the foreign ministry said in a statement. Travellers are advised to avoid "non-essential" travel to India. Meanwhile, the Indian government has also called on the people of Pakistan to observe a total lockdown. India's Home Ministry issued the advisory on Wednesday afternoon. The state of Kashmir is currently under a strict curfew in place since midnight. India also said that the entire country has been put on high alert. A total of 3,900 troops have been deployed in Jammu and Kashmir, including
